Dear Marcel:

**Re: HealthBeat Testimonial**

Many parks have fitness stations and par courses that park goers enjoy, but the interactive HealthBeat equipment from Landscape Structures is a whole new concept in outdoor fitness. The ability to utilize fitness equipment that functions like typical indoor fitness facilities in a natural outdoors setting has had phenomenal participation.

We have seen an incredible increase in usage of our outdoor HealthBeat system over our conventional outdoor fitness equipment. As a matter of fact, we left the old equipment in for a while after the HealthBeat was installed and watched as patrons would pass right by the "old-style" equipment to the new HealthBeat.

Our patrons love the new HealthBeat and we are looking at adding it to several of our other parks in the near future.

Kind Regards

*Joseph R. Abel*
