## PROSHIELD™ FINISH

Landscape Structures Inc. is proud to introduce ProShield Finish, a new and improved product finish that is so tough that it substantially increases the durability of our products.

This is just another example of our continuous improvements to our highest quality, longest-lasting, sustainable playground equipment in the industry. ProShield is a tough finish that combines a specially-formulated primer with a high-quality, architectural-grade powdercoat pigment. This ensures greater durability and protection against harsh UV rays, salt air, high-speed winds and blowing sand.

What this means to you is vibrant long-lasting color, a glossier finish, less corrosion, fewer chips and less maintenance on every Landscape Structures playstructure and Skatewave® skatepark.

### ProShield™ Finish Benefits:

- Your powdercoat finish is better protected against corrosion (verified by lab testing)
- Superior UV protection and gloss retention, even with extended periods of intense sun exposure
- Performs well in high humidity and/or salt air environments
- Resists cracking, chipping and flaking, even when struck with hard objects (rocks, sticks)
- Resists marring and scratches
- ProShield is lead-free and non-toxic

### High Performance Test Results:

#### CORROSION PROTECTION

Tested over 4,000 hours in a high-concentration salt/fog chamber resulting in outstanding corrosion protection within test parameters.

#### COLOR STABILITY

UV performance is tested over 3,000 hours resulting in a minimum 48 percent improvement (virtually undetectable UV fading) and 90 percent gloss retention.

**STEP 3:**  
Super-Durable  
TGIC  
Powdercoat  
Paint  
(.004")

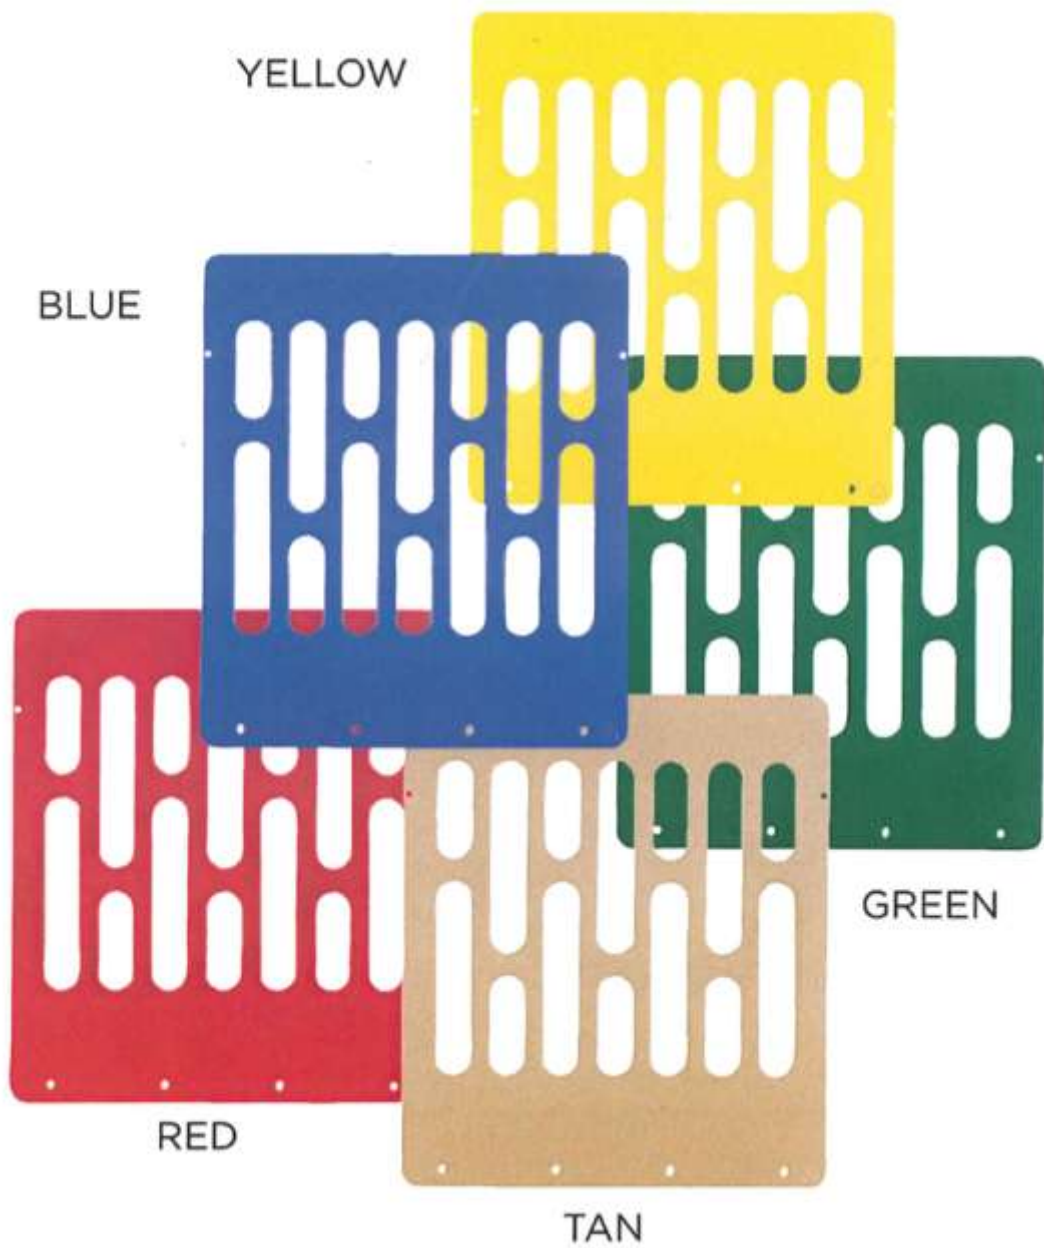

**STEP 2:**  
Primer

POLYETHYLENE

BLUE

TAN

GREEN

GRANITE

RED

For slides, tunnels, roofs etc. Architectural-grade pigments contain no heavy metals and provide longest lasting, UV-stable vibrant colour—and are 100% recyclable! Custom colours available at an additional charge.

TENDERTUFF™ COATING

BROWN

RED

TAN

BLUE

For swing chains, handholds, pipe barriers, wheels, rings etc. Insulates against temperature extremes and provides a safer grip surface compared to painted metal. Note: Walking and standing surfaces (decks, steps etc) are available in brown only.

COROCORD® CABLES

Created from ultra tightly woven, nylon wrapped, six-strand galvanized-steel cable. Abrasion resistant, UV stable, vandal resistant. Easy on fingers and toes. Beveled S-clamp provides a tight, refined look and minimized edge so climbing, bouncing and swinging are more comfortable than ever
