WEEVOS

EVOS

The Evos™ play system, together with its younger companion, Weevos™, are "gyroscopic" worlds where play is possible in every direction and dimension. Spherical shapes open up fascinating worlds, unscripted play routes, and limitless entry and exit points that stimulate the imagination and sense of adventure. Evos and Weevos together offer age-appropriate challenges that encourage kids to exercise their muscles and their minds, improve their strength, balance and coordination, build their problem-solving skills, and develop spatial awareness. Where the challenge-level of Weevos ends, Evos begins – and the fun grows on!

Explore how you can bring state-of-the-art design and challenge to your playground today.

Visit www.playscapecreations.com.au or call (07) 3381 0044 and talk to a Playscape Creations representative.

Big-time fun, small environmental impact

Landscape Structures leads the way in environmental stewardship, and the Evos and Weevos playsystems have been designed to minimize their manufacturing impact on the environment.

The result?? A 30% smaller carbon footprint than traditional playstructures! Plus, they are made of recycled material including post-consumer recycled material, and are 100% recyclable

We believe that honouring the environment is one of the best things we can do for children.

Authentic Corocord® climbing cables

Corocord climbing cables are the highest-grade play equipment cables available worldwide. Designed exclusively for Landscape Structures, **they're made of ultra-tightly woven, nylon-wrapped, six strand galvanized-steel cable.** Corocord cables use an exclusive patented process to inductively fuse the outer layers to the inner **steel strands for extra longevity and safety.** They're also **UV stable** and extremely vandal resistant. That means they last longer and need fewer replacements.

Cable connectors

Count on these durable, cast-aluminium connectors to keep kids safe as they climb, bounce, tug and swing. Connectors have been tested to a minimum weight of 1,600kg each.

Galvanized-steel arches

These hefty, corrosion-resistant arches are incredibly strong and **durable.** **The unique ProShield™ finish ensures that they'll stay great looking for years to come.**

Cast-aluminium ball connectors

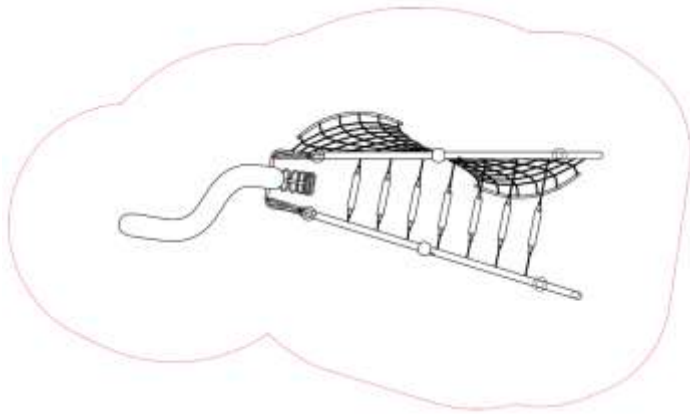

Our two-piece cast-aluminium ball connectors house an innovative and versatile ball-and-socket clamping system designed especially for the Evos and Weevos playsystems. They provide a minimum of 3,000kg of clamping strength to hold each solid-steel ball and 60mm steel supporting arch in place at any angle.

Warranty

Landscape Structures and Park Products Australia offer the most comprehensive long-term warranty in the industry.

100-year limited warranty: on all stainless steel fasteners, aluminium clamps and posts against structural failure due to Corrosion, natural deterioration or manufacturing defects.
15-year limited warranty: on all plastic and steel components against structural failure due to corrosion, natural deterioration or manufacturing defects and on Corocord cables against breakage.
5-year limited warranty: on Corocord climbing cables against natural deterioration or manufacturing defects.

Kids simply can't resist our "gyroscopic" Evos™ playsystem, with a design that's so unique, it's patent pending worldwide. Built to engage children of all ages, including the 12-plus set, this innovative playsystem is the perfect choice for anyone who wants to get kids off the couch and back to the playground.

Evos™ playstructures offer almost endless physical, mental and creative challenges. Kids love deciding how to play on equipment they've never seen before. They can't get enough of the suspended play events and bouncy Corocord® climbing cables, which build upper-body strength and core strength as kids balance and counterbalance their bodies against the forces of gravity.

Imaginations get a workout, too, as kids navigate a playstructure with no prescribed entry or exit points, and where every inch welcomes exploration. Highly configurable, there are 28 versatile Evos™ components to choose from, and more on the way. Great for phased projects: Start with four arches and a few of your favourite Evos™ components, and add from there.

The Weevos™ playsystem is designed especially to promote 2 to 5-year-old growth and development in five key areas: physical, cognitive, sensory/motor, emotional/social and language. Weevos challenges are designed to grow with kids, making it easy for them to graduate from Weevos™ to its companion Evos™, where 5- to 12-year-olds can begin to flex their problem-solving skills along with their muscles.

The cool arched designs and intriguing play components provide a unique destination that kids will flock to. Weevos™ is chock-full of unscripted play events, encouraging imaginations along with physical activity. And every inch of these spherical shapes is part of the three-dimensional play experience, offering endless opportunities for unstructured and inventive fun.

Now, with Weevos™ and Evos™ we offer this complete set of complementary playsystems to encourage healthy development of children ages 2 to 12+.
