

Vanessa Andrew – Di Vita joins our Team as Victorian Regional Manger

Vanessa's role, along with her colleagues is to raise awareness in the industry about the importance of planning and controlled implementation of recreational spaces to fulfil all criteria of cost effectiveness as well as environmental and aesthetic suitability.

Universal consideration of varying age groups and abilities should be encouraged to allow all users to gain maximum social, fitness and developmental benefits from the recreational space.

Up until April 2011, Vanessa worked as National Sales and Marketing Manager at one Australia's oldest companies, The Furphy Foundry, where they focussed on delivering some of the best Urban Design Products both within a Standard range or a complete Customised solution. It is from this and her other extensive industry experience, that Vanessa's ability to have a micro and macro view of our clients' requirements that will best serve the Victorian Market.

"I'm completely amazed with the brilliant relationship with Landscape Structures, who deliver an amazing quality product range. The extent to which both Playscape Creations and Landscape Structures go to from consultation, manufacture, supporting documentation, is like nothing I have ever experienced in any company I have worked for before. Caring about both sustainability and their focus on the continued improvement of their own internal manufacturing processes, makes representing and introducing Victoria to Playscape Creations a very exciting proposition."
