

SUNSHINE PARK, BELLEVUE RIPLEY

Case Study

HB DONCASTER PTY LTD

LEADERS RECREATIONAL INNOVATION

We are a specialist team thinking beyond the conventional to create unique, award winning recreational spaces to benefit children, families and communities across Australia.

We are proud to take you on the journey from design through to completion of our latest adventure play project.

Throughout this project, we have provided our clients with full end to end design, engineering and construction services to deliver a key infrastructure asset to the wider community.

As the leader in the design and construction of adventure, inter-generational and aquatic play environments, we excel in creating unique recreational spaces.

WHERE

Ripley, Qld

WHO

Collaboration between Playscape Creations, HB Doncaster Pty Ltd and The Landscape Construction Company

BUDGET

\$540K

DELIVERED

September 2022

PROJECT OVERVIEW

Located 15 minutes from Springfield, Ripley's newest community, Bellevue Ripley offers elevated, family-sized land parcels and a truly family-friendly outlook.

As part of the Ripley Valley area development, this master-planned community will be home to around 120,000 people by 2040.

The vision for this playspace was to create a place to entice families to move to Bellevue and to create a place to hold community events. Sunshine Park is set to be a much loved playground for its ever growing community.

DESIGN AND ENGINEERING

The main tower play element is inspired by towering rainforest trees and features unstructured play opportunities over 3 levels. The sloping deck levels challenge children to explore 3-dimensional space and develop their gross motor skills as they climb and explore.

Completely enclosed by stainless steel mesh, clear lines of sight are offered across all levels, with the internal dimensions large enough to facilitate active adult supervision and engagement. Access between levels can be achieved through multiple vertical climbing tunnels, ball pommels and nets, with an exhilarating ride to the bottom via the 4.5m tube slide. The lower levels offer inclusive and passive play opportunities with tunnels, nets and a hangout space.

The secondary tower is the cubby which is an enticing “right size” structure that invites younger children of all abilities to explore. Hiding, social and imaginative play experiences abound as children create their own games with their peers.

CONSTRUCTION

Our specialist team constructed the internal framework in our warehouse prior to the crane lift on to site.

Robust materials are for maximum longevity and minimal maintenance - powdercoated steel and aluminium and MDPE slide. Clad with curved powdercoated aluminium tubing in a variety of customisable colours

Playscape Creations' secured Australian supply channel and fabrication network made it possible to deliver this project on-time and on-budget, with all custom product fabrication taking place in our Brisbane, QLD facilities.

PLAY ZONES

The playspace features two play zones; an active play area for children 5+ in the north-eastern corner and a junior play area for children up to 8 years in the south-western corner.

Other play elements include two bay swing with toddler and baskets swings, inclusive orbit spinner, nature play elements all surrounded by shade, seating and plenty of open space.

"Sunshine Park will be complete with a basketball court and play equipment that is sure to entertain for hours. With an undercover shelter, we envision this area being a spot for many kids birthday parties and community events at Bellevue."
