Delivering today's recreational spaces

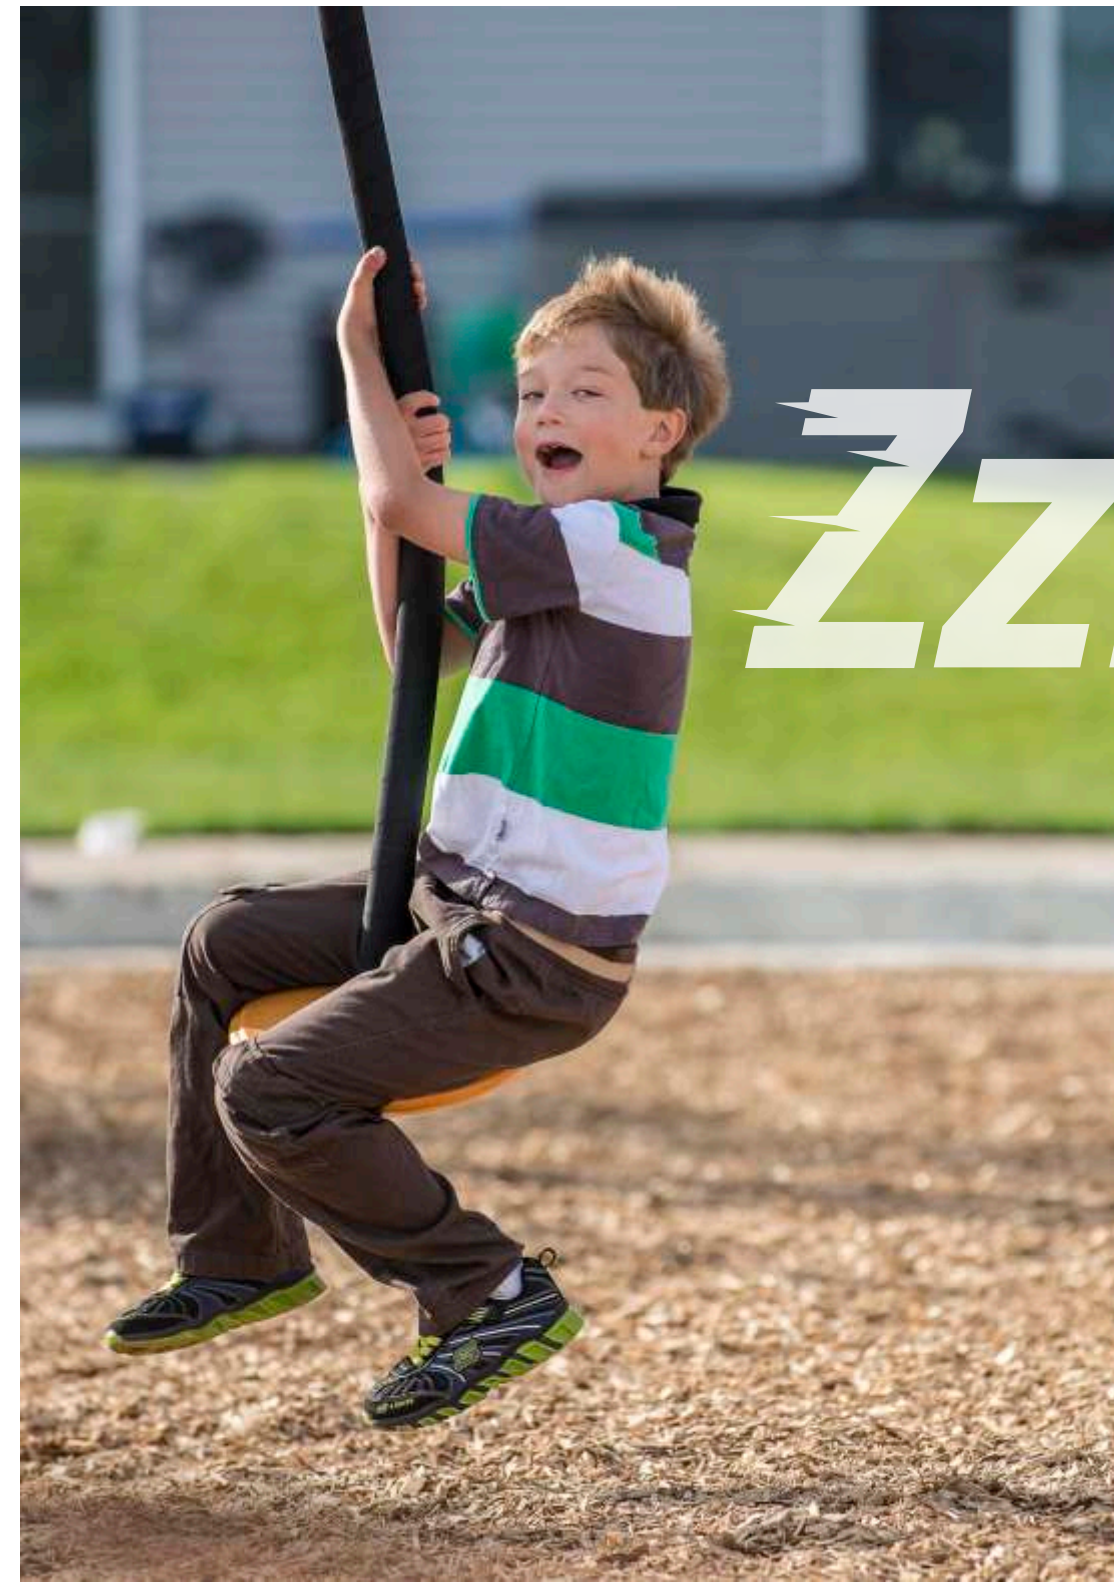

I can fly!

Kids of all abilities are envisioning flying along on ZipKrooz™.

Zip lines have become the fastest growing recreational sport in the world. Now ZipKrooz™ brings the adventure to the playground in an exciting, safe way. Unlike other playground zip lines, ZipKrooz is an ultra-smooth two-way ride, eliminating the need to walk the seat back to the start. Plus, you can pair ZipKrooz Assisted alongside ZipKrooz for truly inclusive play.

Aaaaaaaa

Weeeeeeee

Zziiipppp

ZipKrooz™ is unique because it offers a continuous play experience, unlike other playground zip lines. With ZipKrooz, kids can soar back and forth, from one end to the other, and enjoy nonstop zooming action.

Kids will enjoy a more controlled ride for smoother cruising, without ever jolting or stopping mid-glide. Built-in elevation helps riders gain momentum at the beginning, then slow down at the end. With its unique 4-wheel trolley system and comfortable seats, ZipKrooz is engineered for exceptional quality, comfort and safety.

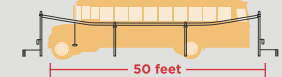

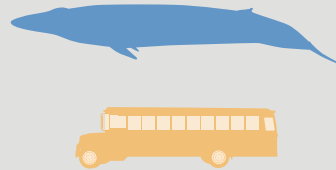

Choose from three lengths of ZipKrooz—or install all three for a graduated experience. Add additional bays, and kids can ride alongside each other as they cruise the ZipKrooz.

We can fly together!

ZipKrooz™ Assisted is the only playground zip line that offers the thrilling feel of flying to all kids. The rotationally molded bucket seat with a lock-in-place harness provides stability and security for kids with limited upper- or lower-body strength. Pair it with ZipKrooz additional bays to ensure a truly inclusive play experience where kids of all abilities can play side by side.

Start zipping with ZipKrooz™ then add one or more additional bays for double or even triple the fun! With three lengths of track available, ZipKrooz can accommodate a smaller playground size or extend the experience further. A decorative and functional track fin adds flair while discouraging kids from accessing the top.

ZipKrooz™ Assisted

Now all kids can participate in cooperative play, stimulate their proprioceptive and vestibular senses and—most importantly—experience the feeling of soaring through the sky.

- Rotationally molded bucket seat with lock-in-place harness provides stability and security for kids with limited upper- or lower-body strength
- 2-way ride
- Easy glide trolley
- Built-in elevation; can be installed on level ground with no embankments needed
- Track available in three lengths: 34', 50' and 66'
- Meets ASTM and CSA standards
- For ages 5 to 12
- **#196212**
- **#196213 Additional Bay**
